Mentoring Policy

MENTORING

Mentoring is a strategy to provide students with emotional and instrumental support they need to achieve learning goals. The purpose of this programme is to identify intervening mechanisms to improve the performance of weak students. In this context few objectives come across to achieve desired result.

- i) To focus and motivate students to achieve learning goals and thereby improve their academic performance.
- ii) To generate interest in academics and other institutional activities amongst students.
- iii) To provide students with information on preparatory courses such as bridge courses, skill courses, etc.

Mentoring includes listening, encouraging, sharing the experience, giving help, advice and guidance to students and pointing them to other sources of support or referral.

1. The mentors have to act on behalf of the college to support learners who are enrolled on a course of study.
2. The mentor will act within an agreed range of confidentiality and will ensure they have the best interests of the young learner in mind at all times.
3. The mentors should be good communicators, excellent and active listeners. They should have a sympathetic approach to sensitive issues and should be able to maintain confidentiality.
4. They should have regular meetings with their mentee and keep records
5. They should make the young learners work for them and take advantage of the young person in any way.
6. The college is responsible for providing training, advice and on-going guidance to the mentors
7. The department heads, tutors and the mentors will meet as a group **once every month** to discuss development ideas and to look at up-coming events and possible pressure points which their mentees might be facing.
8. Any complaint regarding mentors from students should be submitted to the principal directly. And the principal should take due measures to provide the student with other suitable mentor.
